

ASSIGNMENT 6

Textbook Assignment: "Material Custody, Material Stowage, Material Handling Equipment, and Safety," chapter 6, pages 6-1 through 6-18.

-
- | | |
|--|---|
| <p>6-1. The control exercised by an individual over a property or record is known by which of the following terms?</p> <ol style="list-style-type: none">1. Storage2. Equipage3. Inventory4. Custody | <p>6-7. In aviation maintenance, what does the acronym MAM stand for?</p> <ol style="list-style-type: none">1. Maintenance avionics module2. Maintenance asset management3. Maintenance assistance module4. Maintenance activity material |
| <p>6-2. What person has overall responsibility for the storage, security, and inventory control of material stowed in supply department spaces?</p> <ol style="list-style-type: none">1. The supply officer2. The storeroom supervisor3. The QA officer4. The division officer | <p>6-8. Which of the following statements refers to the inventory management of items identified as MAMs?</p> <ol style="list-style-type: none">1. MAMs are part of the supply spares inventory2. MAMs are included in the activity's fixed allowance3. MAMs are not expended to the end user4. MAMs are listed in the AVCAL under the custody of the supply officer |
| <p>6-3. Aboard ship, what officer must authorize stowage of supply department stock in other department spaces?</p> <ol style="list-style-type: none">1. The operations officer2. The air officer3. The commanding officer4. The supply officer | <p>6-9. The custody records of repairable MANs are maintained by which of the following officers?</p> <ol style="list-style-type: none">1. Any division officer in AIMD2. The supply officer3. The AIMD officer4. The operations officer |
| <p>6-4. When supply department stock is stored in another department's spaces, the other department is responsible for all EXCEPT which of the following functions?</p> <ol style="list-style-type: none">1. Physical inventory of the material2. Replenishment of the material3. Security of material4. Location of material | <p>6-10. Aboard ship, the uninstalled items that are located in work spaces to support operational and administrative functions are known by which of the following terms?</p> <ol style="list-style-type: none">1. IMRL2. Equipage3. AVCAL4. MAM |
| <p>6-5. Maintaining the stock records of supply material stored in other department spaces is the responsibility of what person?</p> <ol style="list-style-type: none">1. The designated custodian2. The other department head3. The person using the material4. The supply officer | <p>6-11. Which of the following items should be considered as controlled equipage?</p> <ol style="list-style-type: none">1. Desks2. Permanently mounted fans3. Personal computers4. Forklifts |
| <p>6-6. The assigned custodian for material stowed in other department spaces is responsible for maintaining which of the following records?</p> <ol style="list-style-type: none">1. The financial records2. The location records3. The inventory adjustment records4. The demand records | <p>6-12. Which of the following terms refers to the placement of property in a storeroom or warehouse?</p> <ol style="list-style-type: none">1. Inventory2. Packaging3. Shipment4. Storage |

- 6-13. To maintain control of stored material, you should meet all EXCEPT which of the following criteria?
1. Provide orderly stowage and access
 2. Prevent damage to the ship or personnel
 3. Reduce material loss or damage
 4. Issue the newest stock first
- 6-14. Maximum use of storage space can provide which of the following results?
1. Savings in operational cost
 2. Maximum use of personnel
 3. Limited man-hours
 4. Safety prevention
- 6-15. In material stowage, the storage area within any roofed structure is known by which of the following terms?
1. Facility
 2. Office building
 3. Covered storage space
 4. Hangar area
- 6-16. What type of warehouse has a roof and walls and is used for various storage functions?
1. A refrigerated warehouse
 2. A flammable warehouse
 3. A general-purpose warehouse
 4. A specific-purpose warehouse
- 6-17. Generally, where are the office spaces located in a general-purpose warehouse?
1. On the opposite side of the loading docks
 2. On the same side as the loading docks
 3. In any area inside the warehouse
 4. In the area away from the main aisle
- 6-18. What aisles allow movement of the material handling equipment or supplies through the length of a general-purpose warehouse?
1. The fire aisles
 2. The personnel aisles
 3. The main aisles
 4. The cross aisles
- 6-19. A refrigerated warehouse is usually separated in what total number of parts?
1. Five
 2. Two
 3. Three
 4. Four
- 6-20. The firewalls used in a flammable storage warehouse have what prescribed fire resistance rating?
1. 6-hr
 2. 2-hr
 3. 9-hr
 4. 4-hr
- 6-21. What type of storage facility is used for storing material that needs maximum ventilation but does NOT need complete protection from the weather?
1. A refrigerated warehouse
 2. A chill space
 3. A general-purpose warehouse
 4. A shed
- 6-22. There are a total of how many types of open storage spaces?
1. One
 2. Two
 3. Three
 4. Four
- 6-23. Aboard ship, what space is used as the central distribution area for general-type stores?
1. The rotatable pool storeroom
 2. The SEAMART storage space
 3. The main issue storeroom
 4. The bulk storeroom
- 6-24. Aboard ship, which of the following storage spaces must be located away from magazines?
1. The flammable liquid storeroom
 2. The general stores storeroom
 3. The repairable storeroom
 4. The pre-expended bin storage space
- 6-25. Aboard ship, an allowance list item of equipment needs to be stored temporarily in a shore activity for over 1 year. The ship must obtain storage approval from what person?
1. The stock control officer
 2. The stores officer
 3. The department head
 4. The type commander

- 6-26. When a ship has material that needs to be placed in temporary storage at a shore activity, what activity is responsible for coordinating the offload and return of material?
1. The supporting shore activity
 2. The ship requesting storage
 3. The supply activity ashore
 4. The type commander's office
- 6-27. What form is used to document material offloaded for temporary storage ashore?
1. DD Form 250
 2. DD Form 1149
 3. DD Form 1348-6
 4. DD Form 1348-1
- 6-28. What material protection level provides protection against less severe conditions?
1. D
 2. C
 3. B
 4. A
- 6-29. Until issued, repair parts should be stored in what manner?
1. In bubble wrap
 2. In plastic bags
 3. In waterproof barrier material
 4. In their original container
- 6-30. What type of drawing shows the actual-layout of a storage area and enables the stock person to match the location on the locator file with the floor plan?
1. A planograph
 2. A blueprint
 3. A gross storage space drawing
 4. A net storage space drawing
- 6-31. To keep the number of material locations for small lots to a minimum, which of the following actions should you take?
1. Delete the locations
 2. Relocate material to another storeroom
 3. Combine the material into one location
 4. Change all of the locations
- 6-32. When material is transferred to another location, what person is responsible for ensuring that the material is properly stowed in the new location?
1. The AK physically moving the material
 2. The storeroom supervisor
 3. The supply division officer
 4. The supply officer
- 6-33. The space occupied by bins and pallet racks in a warehouse is known by which of the following terms?
1. Operating space
 2. Work space
 3. Gross storage space
 4. Net storage space
- 6-34. In a storage space ashore, the first three digits of the location number identify which of the following information?
1. The building number and stack
 2. The row and stack
 3. The floor and row
 4. The building and floor number
- 6-35. Ashore, in the location number 123-456-789, what does the number 9 identify?
1. The building number
 2. The level within a stack
 3. The stack
 4. The row
- 6-36. Which of the following factors should you consider when assigning a location for material?
1. The quantities and types of materials
 2. The characteristics of the materials
 3. The security and safety of the materials
 4. All of the above
- 6-37. Aboard ship, the first two digits of a location number contain what information?
1. The compartment number
 2. The storeroom number
 3. The level number
 4. The space category
- 6-38. A standard pallet is what size?
1. 36 by 40 in.
 2. 38 by 48 in.
 3. 40 by 48 in.
 4. 42 by 40 in.

- 6-39. The construction of a two-way entry pallet allows the forks of a forklift to enter from which of the following pallet positions?
1. Front or side
 2. Rear or side
 3. Either side
 4. Front or rear
- 6-40. Most 2,000-pound forklift trucks will lift 2,000 pounds if the load does NOT extend beyond what maximum distance from the heel or fork?
1. 10 in.
 2. 20 in.
 3. 24 in.
 4. 36 in.
- 6-41. Which of the following stowage aids is used for storing odd sized items or weak containers that will NOT support a superimposed load?
1. Safety pallet
 2. Horizontal dunnage
 3. Box pallet
 4. Notched spacers
- 6-42. When using a forklift to elevate personnel, you should use which of the following types of pallets?
1. A box pallet
 2. A safety pallet
 3. A standard pallet
 4. A winged pallet
- 6-43. Which of the following stowage aids can be made from cut salvaged lumber and used to protect material from water damage?
1. Standard pallets
 2. Notched spacers
 3. Pallet racks
 4. Floor dunnage
- 6-44. Which of the following stowage aids are used for horizontal palletizing of compressed gas cylinders?
1. Notched spacers
 2. Pallet racks
 3. Box pallets
 4. Collars
- 6-45. Information concerning hazardous material procurement, transportation, fire-fighting, spills, and leaks can be found in which of the following publications?
1. NAVSUP P-485
 2. HMIS
 3. NSTM, chapter 593
 4. NAVSEA S9593-A7-PLN-010
- 6-46. Aboard ship, when acid is stored in a flammable storeroom, the storeroom must be provided with which of the following materials?
1. Wood deck plates
 2. A plastic liner that covers the deck area
 3. A watertight rubber liner that covers the entire deck and lower part of the bulkhead
 4. Rubber tiles
- 6-47. The HMIS lists oxidizing material by what special material content code ?
1. A
 2. D
 3. H
 4. J
- 6-48. Unless otherwise specified, compressed gas cylinders must be stored in what area on a ship?
1. Outside the flammable storeroom
 2. On the weather deck
 3. On either end of the ship, below the waterline
 4. In the bulk storeroom below the main deck
- 6-49. Compressed gas cylinders are color coded for which of the following reasons?
1. To identify the type of cylinder
 2. To identify the amount of gas in the cylinder
 3. To serve as a hazard warning
 4. To prevent corrosion
- 6-50. OPNAVINST 5510.1 covers which of the following types of material?
1. Hazardous material
 2. Aircraft material
 3. Support equipment material
 4. Classified material
- 6-51. Aboard ship, a drummed product is stored in what manner?
1. On its end with the bung end up
 2. On its side secured with spacers
 3. On its end with the bung end down
 4. Horizontally

- 6-52. For storage of deteriorative material, such as batteries and rubber products, what environment is the most desirable?
1. Warm and dry
 2. Cool and dry
 3. Warm and humid
 4. Extremely cold and humid
- 6-53. Aboard ship, aircraft engines must be secured in a manner that will prevent them from shifting in which of the following directions?
1. Forward only
 2. Port or starboard only
 3. Aft only
 4. Forward, port or starboard, and aft
- 6-54. The corrosion preventive maintenance on aircraft engines is performed by what department?
1. Engineering
 2. supply
 3. Aircraft maintenance
 4. Operations
- 6-55. Which of the following equipment is used to pickup, carry, and stack unit loads of supplies and material?
1. A two-wheel hand cart
 2. A hand pallet truck
 3. A tractor trailer
 4. A forklift truck
- 6-56. In reference to a forklift truck, what is meant by the term "free lift"?
1. The maximum lifting height of the forks
 2. The safe distance of the forks from the ground when traveling
 3. The lifting height of the forks before the inner slides move above the mast
 4. The maximum height of the forks when lifting loads over the weight limit
- 6-57. A forklift truck should NOT be used to move loads beyond what maximum distance?
1. 100 ft
 2. 200 ft
 3. 300 ft
 4. 400 ft
- 6-58. When moving loads beyond the maximum travel distance for a forklift, which of the following equipment should you use?
1. A hand pallet truck
 2. A tractor-trailer train
 3. A pneumatic wheel forklift
 4. A hand cart
- 6-59. Under normal supply operational conditions, a tractor should operate with a maximum of how many sets of trailers?
1. One
 2. Two
 3. Three
 4. Four
- 6-60. What is the rated drawbar pull range of a Navy gasoline-powered warehouse tractor?
1. 1,000 to 2,500 lb
 2. 2,500 to 3,000 lb
 3. 3,000 to 4,000 lb
 4. 4,000 to 7,500 lb
- 6-61. When warehouse operations involve short hauls and frequent stops, which of the following equipment should be used to move the material?
1. A two-wheel hand cart
 2. A tractor trailer
 3. A four-wheel platform hand truck
 4. A stock picker
- 6-62. The forks of a Navy hand-pallet truck can be raised what prescribed distance from the deck?
1. About 1 in.
 2. About 2 in.
 3. About 3 in.
 4. About 4 in.
- 6-63. What device is equipped with horizontal bars and is used to lift palletized loads by a crane or ship's boom?
1. A pallet sling
 2. A spreader bar
 3. A forklift truck
 4. A cargo net
- 6-64. The HMIS is issued at what prescribed interval?
1. Monthly
 2. Bimonthly
 3. Quarterly
 4. Annually

6-65. For protection from falling objects when working in areas where lifting or hoisting operations are performed, you must wear which of the following safety equipment?

1. A protective helmet
2. Rubber gloves
3. Goggles
4. A rubber apron

6-66. In warehouses ashore, the fire doors near the aisle must have what minimum clearance?

1. 12 in.
2. 24 in.
3. 36 in.
4. 48 in.
